**COMPLETE INDEX**  
**TO ALL SHARPSOFT USER NOTES**  
**1981-1988**

**(MZ-80 SERIES VOLS. 1-18, 1981-85)**

**(MZ-700 SERIES VOLS. 1-11, 1983-88)**

## COMPLETE INDEX TO ALL SHARPSOFT USER NOTES, 1981 - 1988

## CONTENTS

|                                                     |    |
|-----------------------------------------------------|----|
| Notes on Volume numbers and dates                   | 1  |
| Index to Sharpsoft MZ-80A/B/K User Notes Vols. 1-18 | 2  |
| Index to Sharpsoft MZ-700 User Notes Vols. 1-11     | 9  |
| Editorial                                           | 12 |

## Notes on Volume numbers and dates

- Volume 1 of Sharpsoft's MZ-80A/B/K USER NOTES is dated January 1981. Volume 2 is dated June 1981. Volume 3 was published later in 1981 but does not carry a specific date.
- In 1982 and 1983, the MZ-80A/B/K USER NOTES appeared 3 times in each year. These Volumes (4-9) are not dated, but the editorial in each Volume gives the expected date of its successor.
- In 1984 there were 6 Volumes (10-15) of MZ-80A/B/K USER NOTES. The change to thinner and more frequent issues was made as a result of readers' letters. In July 1984 the copy for Volume 13 was lost in the post, and an emergency substitute (84 pages of listings!) was produced. The original copy for Volume 13 was later recovered, and was used for Volume 14. In all except Volume 13, the editorial carries the expected date of the next issue.
- In 1985 the MZ-80A/B/K USER NOTES reverted to 3 issues (16-18). The first two give the expected date of the next issue, but the editorial to Volume 18 reveals that it is the last of the series.
- Volume 1 of the MZ-700 USER NOTES is not dated; but it contains a 1984 subscription form identical to that in Volume 9 of the A/B/K USER NOTES. This fixes its probable date of publication as late 1983, a date confirmed by editorial comment in subsequent issues.
- Volumes 2-9 of the MZ-700 USER NOTES are not dated; but in accordance with Sharpsoft's previous practice most of these Volumes carry the scheduled publishing date of the next Volume.
- Volume 10 of the MZ-700 USER NOTES is dated simply '1987'. Volume 11 of MZ-700 USER NOTES is dated 'SPRING 1988'; its editorial, headed 'THE END OF AN ERA', announces the end of all S.U.N.
- The rough calendar for S.U.N. publications is therefore:-

|                                         |      |
|-----------------------------------------|------|
| A/B/K Volumes 1-3.....                  | 1981 |
| A/B/K Volumes 4-6.....                  | 1982 |
| A/B/K Volumes 7-9 and 700 Volume 1....  | 1983 |
| A/B/K Volumes 10-15 and 700 Volumes 2-4 | 1984 |
| A/B/K Volumes 16-18 and 700 Volumes 5-6 | 1985 |
| .....700 Volumes 7-9                    | 1986 |
| .....700 Volume 10                      | 1987 |
| .....700 Volume 11                      | 1988 |

| Subject                                | Author      | Vol. | P. | (Lines) | Type    |

THE COMPLETE INDEX TO SHARPSOFT USER NOTES

This little booklet is the brain-child of member Leslie Finlay. Leslie, who lives in London and runs an MZ-700, makes no secret of the fact that his inspiration came directly from Andrew Ferguson's work a year ago which, on a tape-based MZ-80K, produced an Index to all of our own S.U.C. Magazines up to 1988.

Leslie uses an MZ-700 coupled to a daisy-wheel typewriter with a 'COURIER 10' typewheel, and the Word-Processor 'LEGEND'. He used this system to create the main pages of this booklet. As Editor, all I had to do was to write pages 1 and 12; by great good fortune these two pages are in the same typestyle as the rest, because my daisy-wheel printer is also fitted with a 'COURIER 10' typewheel.

The similarity between the typestyles is obscured by the fact that, in photocopying the originals for printing, pages 2-11 were reduced by a greater factor than pages 1 and 12. This was required because Leslie's daisy-wheel printer could not do the reduced-size print needed to get each Index entry on one A4 line; he therefore printed out pages 2-11 on B3 size paper (portrait), and I had them reduced to A4 to send to the printer with pages 1 and 12. The printer reduced everything to A5 to make the printing plates.

I mention all this to show that there is, as usual, more than one way of killing the cat. We could have opted to do the job on dot-matrix printers; but as both of us had daisy-wheels we thought it would be nice to use them. So, using modern copying technology, we have produced the equivalent of a 'reduced-print' daisy-wheel!

In proof-reading the Index I was amazed to find that an enormous amount of very useful information was published in the two series of Sharpsoft Magazines. I must admit that before Leslie produced this Index, I felt that these Magazines carried too many listings; a feeling that was reinforced by Volume 13, produced under what I now realise were very difficult editorial circumstances.

I am glad to say that, mainly as a result of working on this Index, I have come to recognise that these Sharpsoft publications are extremely useful to the dedicated Sharp enthusiast, even if they do contain a high proportion of programme listings, with the inevitable misprints and errors that such listings always seem to involve. To quote a few obvious examples, they contain a lot of very valuable information on Pascal, Forth, and Tiny-C, and on the intricacies of getting standard disk drives to work on an MZ-80K (a 4-part series that was very unfortunately interrupted by the accident to Volume 13). If you look carefully there are a great many useful hints and tips for all our beloved machines scattered throughout the 29 issues of S.U.N., and Leslie has done a great job in spotlighting them by producing this Index.

Needless to say, if anyone wants photocopies of articles from unobtainable issues, I am always happy to oblige given enough to cover copying costs and return postage. But I understand that most if not all issues are still available from Sharpsoft at 82, Great Eastern Street, London, EC2A 3JN (Tel. 01 739 8559).

Weymouth, January 1990
